1 Part A (50 points)

- Create a project "Lab1_2017_{ID}" to implement the program for a local museum's curators. The implementation details are on the next document.
- Create Package "logic" and put the template of each class into this package.
- Create Package "test" for the JUnit Test Case and download all of the java test files into this package.
- After finish the program, export your project into a jar file with sources called "Lab1_2017_{ID}.jar"
- Submit the jar file along with your answers (in docx or odt) to mycourseville.
